BACKGROUND

1. Started in 2002
2. FY 13 turnover \$ 4.56 million
3. Core competency
 - a. Consulting
 - b. Procurement
 - c. Process engineering
4. Head office Karachi
5. Number of employees 70
6. Gst registered

OUR INFRASTRUCTURE

insight⁷con

Builtup area of more than 5000 sq. ft. which has been divided into 6 major departments. Located at the central business area of the city. Entire premises including Entrance, Reception & other area are monitoring by CCTV camera. Door Access System & Biometric System are installed for security purpose. Dedicated internet high speed line. Customer support - Online, Email, Phone calls & with help of Team Viewer. Workplace is complete with all support services & activities.

OUR APPROACH TO PROCUREMENT MANAGEMENT

When supply cost pressures increase, so does the opportunity to gain an important source of untapped margin. By taking a more comprehensive approach to what we buy and how we buy it, companies can free up cash and refocus resources to fun strategic priorities without the pain of layoffs. A comprehensive approach means deploying a broader set of tools to better negotiate prices or becoming more efficient at using supplies. It also means getting full organizational alignment resuring that roles, decision rights & incentives all work toward the goal of lowering procurement costs.

PROCUREMENT OF ENERGY

1. Insight Consulting procures following items for its clients in energy sector
 - a. Generators
 - b. Solar power
 - c. Fuels
 - d. Lubricants

PROCUREMENT OF IT

1. Insight Consulting procures following items for its clients
 - a. Desktop software
 - b. Hardware
 - c. Mobile software
 - d. Point of sale software
 - e. Point of sale hardware

CLIENTS

SOLAR & RENEWABLE ENERGY

OUR COMMITMENT

Our Commitment to Renewable Energy

With massive rise in fossil fuel, electric tariffs & load shedding the only real salvation is in use of renewable energy resources. Solar is the solution to have a safe future without any dependencies.

Insight Consulting is a leading renewable energy provider. It provides end to end turn key solutions for energy system design and integration services. Insight Consulting has recently launched its operations in Pakistan market to introduce the benefits of renewable energy technologies to our customers & assist them in use of clean, for free renewable energy solutions to meet the ever growing demand for electricity.

Company Vision

We are sure that it won't be much longer until all the energy we need to live on earth will be produced cleanly & decentralized & be shared fairly. To turn the energy supply system around, all efforts must aim to grow the renewables.

We consider ourselves a part of the global network shaping this transformation.

Our Services

We provide services starting from the enquiry all the way for commissioning of the system. All services performed by Insight Consulting are 100 percent guaranteed.

PARTNERS IN PROGRESS

Our Experience to Serve You

- More bank client choose insight consulting than any other clean energy company.
- Our 100 employees are dedicated to serving our customers.
- On an average day, we help a new family go solar every 5 minutes.

We Do Great Work

- We are skilled & knowledgeable thorough professionals who build systems to last.
- Our house engineering team will custom design your system.
- We select only the best in class, high quality panels, equipment & hardware.
- Safety is important to us. We will keep your home, your family & our crew safe.

We Lower Your Energy Costs

- We offer a cleaner, more affordable alternative to your utility bill.
- We constantly innovate better ways to achieve clean energy savings.
- We know that the customers wants a better cleaner, cheaper electricity & we don't believe you to make compromises to get it.
- We guarantee our quote price per kwh, it will not change throughout the project.

We Make it Simple

- Our Customer Care team will manage your project from start to end, including engineering design, installation, rebate applications & ongoing support.
- Your online account has been upto date like : your project status & customer resources.
- Insight Consulting shows us how to perform at a glance & allow insight consulting to respond if needed.

We Partner for the Long Term

- By looking holistically at both your gas & electricity usage, we can save you more money by using less energy with our energy vehicle chargers.
- A third of our new business comes from satisfied customers.

ENVIRONMENTAL BENEFITS

We believe individual energy choices have a direct impact on the environment and together we can make a real difference.

Your system will offset 192,953 lbs. of CO₂, saving the equivalent of

Save more with other clean energy products

Driving a Car
207, 234 Miles

Home Energy Evaluation

A comprehensive audit will also diagnose the causes of energy loss & prioritize improvements with greatest impact.

CO₂ Absorbed
by 104 Trees

Energy Improvements

We advise to implement energy upgrades to heating, air conditioning, insulation, water heaters & more.

Gallons of water used
to make electricity

Energy Vehicle Chargers

We also install electric vehicle charging systems which are compatible with all EV's. Combined with solar power, you can drive on sunshine!

MAJOR APPLICATIONS OF RENEWABLE ENERGY

Commercial

We provide solutions to Software Houses, Office, Buildings, Shopping Malls and Billboards so they can take the stress off from the energy crises & focus on their primary business.

Telecommunication

Insight Consulting provides major applications of renewable energy in telecommunication sector is for electrocution of rural located base station & microwave repeaters.

Industrial

Insight Consulting is focused in providing solutions to oil industries starting from small projects to all the way of mega projects. Textile, Pharmaceutical, Dairy, Sports, Live Stock & Telecommunication are the primary focus.

Urban Development

Insight Consulting plays a vital role in urban development by providing solar based Street Lights, Traffic Signals, Parking Lots lights & aviation lights.

IPP

If you are looking to become an Independent Power Producer & sell electricity to the government of Pakistan, Insight Consulting can provide all the services starting from design all the way to commissioning.

Agriculture

We provide solutions to the agricultural sector all around Pakistan: Solar Water Pumps, Solar Farm Lights & Solar Tube Wells.

MAJOR APPLICATIONS OF RENEWABLE ENERGY

Medical Facility

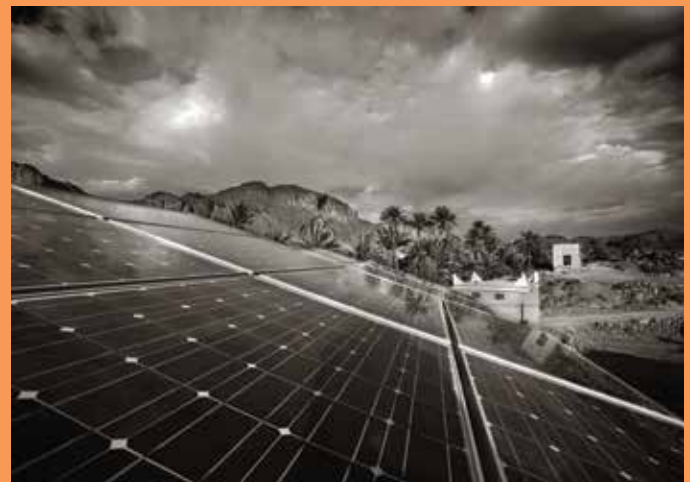

Renewable energy could be the source of primary/alternate power generation of the entire medical facility.

MAJOR APPLICATIONS OF RENEWABLE ENERGY

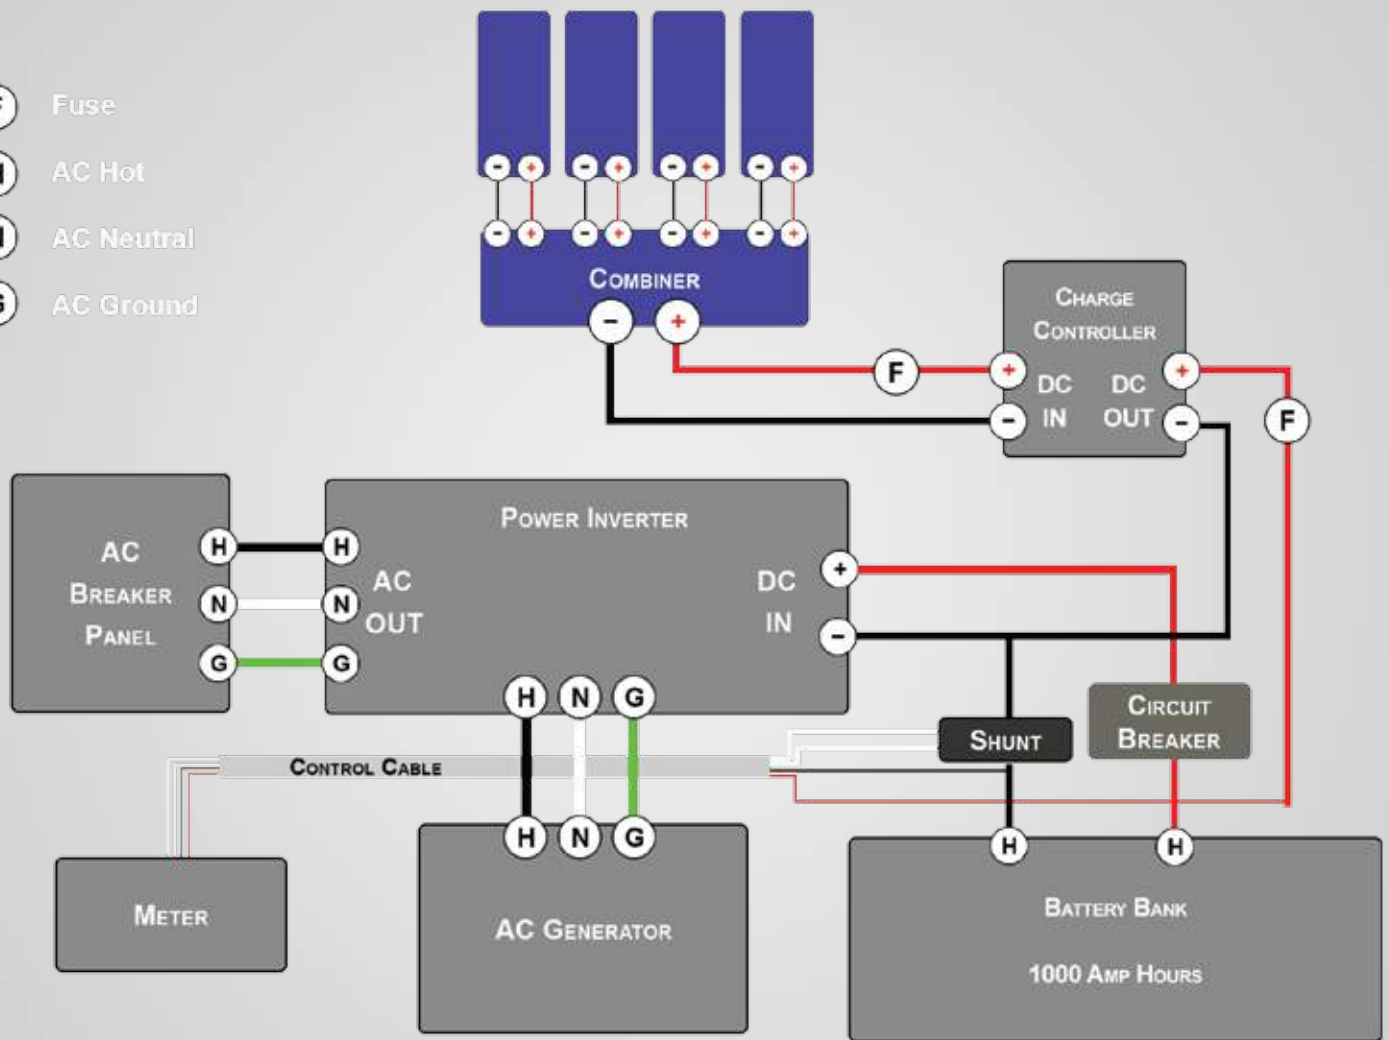

Rural Electrification

Working with governmental & nongovernmental organizations (NGO), Insight Consulting will bring electrical power to rural and remote areas. Besides the obvious benefit that electricity will bring to daily lives of villagers, more importantly the reliable electrical supply will enable them to improve their economic condition.

SOLAR POWER SYSTEM WORKING FLOW

- G** AC Ground

SOLAR POWER SYSTEM

SOLAR TUBEWELL

Specifications

Why we use Solar Tubewell System

Our submersible tube well systems are designed to be used in a variety of applications in rural & urban areas. Some of the potential applications are in drip irrigation, livestock watering, watering the cultivated area etc.

What are the advantages of solar tubewell systems?

Solar tube well in Pakistan is the best combination of utility and efficiency. Following are some of the advantages of using our solar tube well systems:

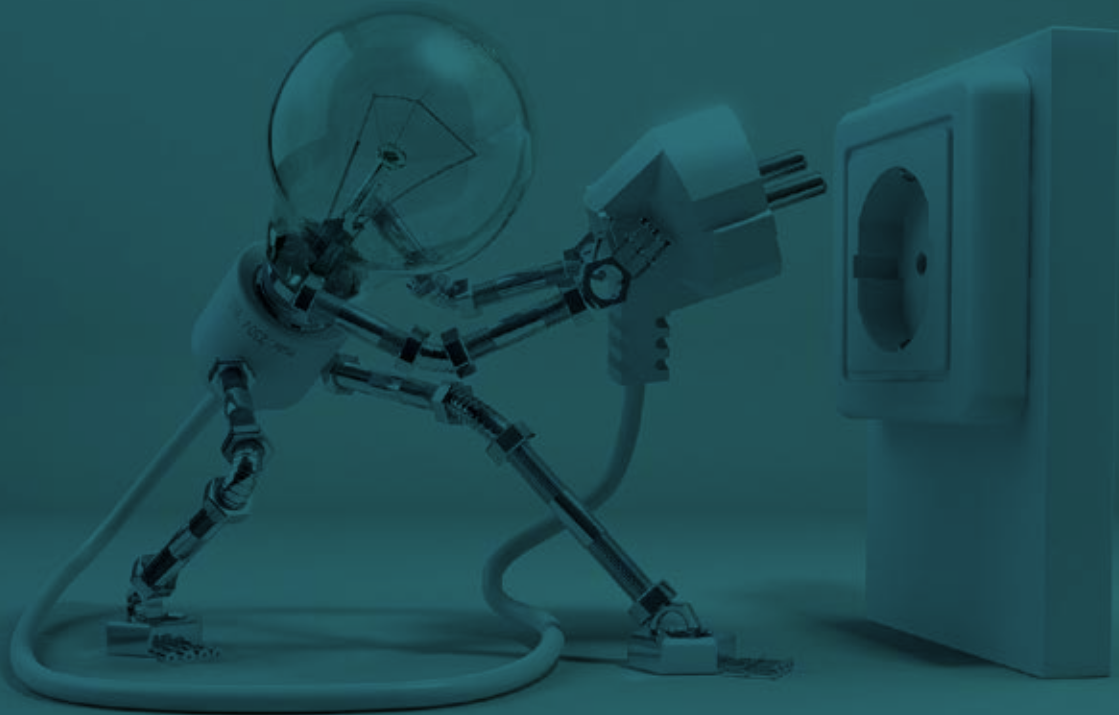

- Zero Running costs of the systems
- Our solar tube wells require No maintenance
- No Electricity Bill!
- No need to pay for fuel costs or deal with fuel spills
- Solar tube wells are easy to install
- Solar tube wells are simple & reliable
- Unattended operation of our solar tube wells means that you are free for other tasks

In addition to above points, solar tube well in Pakistan are the most economical solution for all water pumping needs of all sectors of the economy. Solar tube well use solar power panels to run solar pump.

Configuration of Solar Tubewell Systems

Solar pumps in a wide range of configurations for various domestic, farming & agricultural applications. Our experts take into account all your needs & then recommend a solar pump configuration that best suits your needs. Please note that these Solar Tubewells work at all depths from 10 to 600 feet. All the systems employ pumps made by Insight Group Holdings.

ALLSPARK UPS BASICS SYSTEM & MAIN FUNCTIONS

General Introduction

The Allspark UPS Backup solution for home, bank, Office & Industries without a Solar Panel system. The Allspark UPS will be charged with grid (Electricity) only.

The Allspark UPS system gives long backup upto 8hrs to 10hrs. With the Powerwave 1000's front access panel, replacing battery pack which no longer requires the critical load to be interrupted, ensuring you are always protected 24/7.

The continuous supply of power is critical to commercial & industrial process installations. A power failure, or even minor disturbances in the power supply, will interrupt the process chain & eventually result in system shutdown. This could cause substantial financial losses or even jeopardize the safety of human lives.

The key function of Allspark UPS systems is therefore the protection of electrical power supplies to installations (also called consumers or loads), which cannot tolerate even the slightest voltage interruption or inconsistencies. Unfiltered electrical power supplied by utilities may contain harmonics, sags, spikes or noise. Introducing one or more Allspark UPS systems along the power supply chain will effectively eliminate these disturbances.

Most importantly, during power failure conditions, the Allspark UPS will bridge the critical power supply gap. In these instances, the system automatically switches to large battery banks to draw the required electrical power until mains is again available. This occurs without affecting the load performance. The size of the battery banks & eventual alternative power source (bypass, diesel power generator), depend on battery configuration.

Allspark UPS systems are often installed to support the safe shutdown & reboot of critical process installations. Modern Allspark UPS systems provide auxiliary functions such as automatic monitoring, system performance testing & alarm display.

INTRODUCING
PAKISTAN'S
FIRST LONG BACKUP UPS UPTO
8 HOURS

Major Benefits

- Event log of all activities affecting the battery bank.
- Remote access - via TCPIP or Modbus.
- Automatic capture of data & report generation.
- Individual UPS impedance measure.
- Optical isolation for increased safety.
- Individual & ambient battery temperature measure.
- Individual & battery string voltage & current measure.
- Compatible also with Ni-Cd & Lead batteries, open or recombination types.
- Wide choice of configurations to meet one of the most complex architectures.
- It also reduces maintenance costs through preventive maintenance instead of emergency replacement.
- It has maximized battery life through smart diagnostics, regular data analysis & on time remedial action.
- It increases its safety on the site as backup power remains always available & less human presence is required in the battery room.

THE BEST ALLSPARK UPS SYSTEM IN PAKISTAN

Allspark UPS Bank Backup

Applications

- This emergency Backup Power System is a must have during electricity unstable, load shedding & other natural disasters!
- If managed carefully, this system will run for days while powering up your:
 - Lighting
 - Cell phones
 - Well pump
 - Refrigerator
 - Internet
 - Security alarm

Seamless Electrical Coverage

- This 240-volt backup power unit incorporates an inverter that monitors the grid for disruptions. When the grid goes down or is disconnected, the inverter switches to battery backup in less than a milli second, (because Allspark design as an online architecture) keeping your critical loads online until the grid comes back.

Major Benefits

- Stop getting left in the dark! Simply install the Battery Bank Backup System & you are ready to go when the utility grid is knocked out or unstable.

Fire & Safety

Insight Consulting is specialising in trading and installation of fire fighting, safety and security equipment, systems and services maintaining a wide range. We can proudly claim to be one of the best in this field in Pakistan with most professionally trained team in the industry.

Services

At Insight Consulting we offer a wide range of fire & safety services to meet your specific need, all backed by trained professionals. Our range of services include; Servicing & Maintenance of Fire Equipments, Fire Health & Safety audits

Our Mission

To provide complete solutions in fire prevention, protection, security and occupational health and environmental safety, to all industry sectors, which are committed to the latest technology and high quality products, services and utilizing a team of professional expertise in Pakistan.

KCC Paints

Insight Consulting exclusively represent KCC for their entire product range covering paints and construction products. The Major areas of focus in the Paints Business are Heavy Duty, Refinish and Decorative Paints. Insight Consulting in a very short span of time has developed a long list of reputable customers including MNC's in the industrial and OEM sectors. Insight Consulting is also at out set of setting pre-treatment business.

Chemicals

In the Chemicals Business Insight Consulting focus on a agency relationships with renowned International suppliers. At the same time Insight Consulting have developed a product portfolio consisting of select general and specialty chemicals targeted at the major industrial sectors of the country like sugar, plastic, petroleum, ethanol, textile and others .

Indent & Bulk Commodities

Bulks Business is the major contributor of Insight Consulting turnover and profits. Indent business of cement Clinker, mil scales, Chromium and ethanol of distillers other than group are major area of business. The business is actively pursuing developments in the Metals, Seeds, and food sectors.

Elevators

Insight Consulting is one of the world's leading elevator companies. As a step up in vertical integration based on the concerns of quality, cost, and supply time Insight Consulting established this service. Insight Consulting strived in its pursuit of delivering a quality product maximizing customer satisfaction in every possible way. It provides its customers with industry leading elevators and with innovative solutions for their maintenance and modernization.

Standard VVVF Control Panel

We also hold expertise in manufacturing of Standard or DOL (Direct On Line) controllers that meet application demands in the Elevator industries. These are specially made for elevators and feature swift operating system with 5 Hp motor that delivers in them clear digital indications. Further, these controllers also have minimum maintenance requirements during working.

Our Mission

We shall provide total customer satisfaction and achieve leadership in chosen markets, products and services across the globe, through excellence in technology, based on research and development. We will invent, develop and successfully market elevator products to prevent more efficient, affordable and right value to our customers. We Determine to provide better quality.

School **Tracking System**
Safety **Ensured**

Features of the Smart Tracking System for School

Tracks and monitors all school vehicles in real time. Sends auto alerts to parents about actual arrival and departure time of the buses. Parents can log in to access real time information on status of bus locations. Sends auto alerts to parents about pick and drop status of their children.

Auto Alerts

Management gets instant alerts when the Parent school vehicle enters a no go zone or when drivers are involved in unsafe and speedy driving. Contacts between drivers and school management using latest technology. Auto alerts to parents and school management during emergencies and for delays.

GPS & RFID

Busfinder is the GPS enhancement designed for the route finder for pro transportation management solution. It interfaces with your GPS system by displaying bus locations and path points on route finder pro maps so that you can see that your buses where they are supposed to be.

Server for Bus Tracking Records

The system offers both Web & SMS based access to the Central Server so that real time data information about the status of school bus is shared with school principals at any time, so they can keep 24/7 tracking record about their students.

Home Tracking Device

The parent is capable of monitoring the vehicle movement in a user friendly map in real time. The interface will provide the scheduled time of arrival (STA) & the estimated time of arrival (ETA). Any delays from traffic related issues can be identified by looking into the map location.

Confirmation SMS

Enables parents to receive SMS alerts when school bus is within the vicinity of the designated pick up points. Active RFID sends confirmation SMS when the child boards the school bus. Active RFID Sends confirmation SMS when the child alights from the school bus. Enables parents to receive SMS alerts when school bus is within the vicinity of the designated drop off points.

RFID Card

Students swipe an RFID card over a reader installed on the bus, and their name, the date, location and time that they boarded and disembarked the bus is transferred to the school or bus company. Automatic recording of the movements of students including their tracking and monitoring in the school campus is easy with RFID technology. Come any emergency/requirement, they can be reached fast and easy. RFID also facilitates attendance of the teacher.

24/7 Online Tracking

GPS tracking technology is giving parents peace of mind and helping kids stay safe through a program that tracks school buses on their daily routes. The device delivers the data to track your vehicle hosted application, which you can access through our website at any time. You will receive real time vehicle tracking updates including location, speed, direction, idle time, start or stop and more, allowing you to manage a tighter schedule.

Database System

Student information has never been so easy to manage. Quick Schools is an interactive database of student information that is easily accessible and always available for qualified staff. It ensures that administrators will have access to the most recent student info. The database includes basic info about address, sibling names, grades, parents & contact info. This database is linked to all of the student's school classes & activities.

Our System Features

GPS and RFID units install in Bus. Long battery life units with regular data reporting via the GSM/GPRS mobile phone network back to the server. Geo fencing creating multiple user defined zones and boundaries. Creating custom rules associated with vehicles or objects passing into or out of an area or location that may trigger further actions or messages. Issue alerts by SMS, systems messages or email if rules or conditions are triggered such as a zone boundary being crossed by a specific vehicle or object.

Reporting

View object movements in real time by configurable tables or through on screen apping with different icons for each object class. Real time position reporting.

Notifications

Automatic arrival and departure notification with date or time stamp. Snail trails and journey reports. The system supports combined GPS and RFID reporting knowing where your vehicle is and what road it's on. Route history log and reports including downloads to MS Excel Spreadsheets for further analysis."
